ABC's of Plant Pathology (English Session)
 Kearney Agricultural Research and Extension Center
9240 S Riverbend Ave, Parlier, CA 93648
 February 16, 2017 8:00am – 11:30am
 registration fee: \$55

Presenter: Steve Tjosvold, Environmental Horticulture Advisor, UC Cooperative Extension, Santa Cruz and Monterey Counties.

Continuing Education Units: 2.5 “other” DPR units requested

This half-day workshop focuses on basic aspects of plant pathology that are relevant to greenhouse and nursery production of ornamental plants. Attendees will learn about the Disease Triangle consisting of host, pathogen and environment. The interaction of these three components is the foundation of plant pathology and the management of diseases. A hands-on session will enable attendees to see live examples of local plant diseases using microscopes and projected magnified images.

Time	Title	Topics
8:00am	Registration	Registration and refreshments
8:30am	Plant Pathology Part 1	The Disease Triangle, Disease Cycles, Fungi and Fungal Diseases, Bacteria and Bacterial Diseases, Viruses and Viral Diseases, Nematodes and Nematode Diseases
10:00am	Break	
10:20am	Plant Pathology Part 2	Emerging Diseases on Ornamentals, Diagnosing Plant Pathogens, IPM strategies for Disease Control, Rapid Assays for Pathogens
11:00am	Hands-on session	View live specimens of various plant diseases under magnification
11:30am	Adjourn
